KOMPAS 10-12

INTRODUCTION

Kompas 10-12 is designed for students aged 10 to 12 to help them discover their career interests and explore different career fields at an early stage. It looks at both their interest and exposure to different career-related activities, helping students understand the areas they enjoy and those they have had opportunities to experience.

The assessment introduces students to six broad career fields, encouraging them to discover areas that may interest them and explore future learning and career possibilities. Kompas 10-12 is developed as an early career exploration assessment to support career guidance, educational pathway exploration, and informed decision-making for students, parents, schools, and education authorities.

6 CAREER FIELDS

FEATURES

Age-Appropriate Career Exploration

Kompas 10-12 is designed specifically for students aged 10 to 12, using an age-appropriate approach to introduce them to different career fields and encourage early exploration of their interests and future possibilities.

Interest Discovery

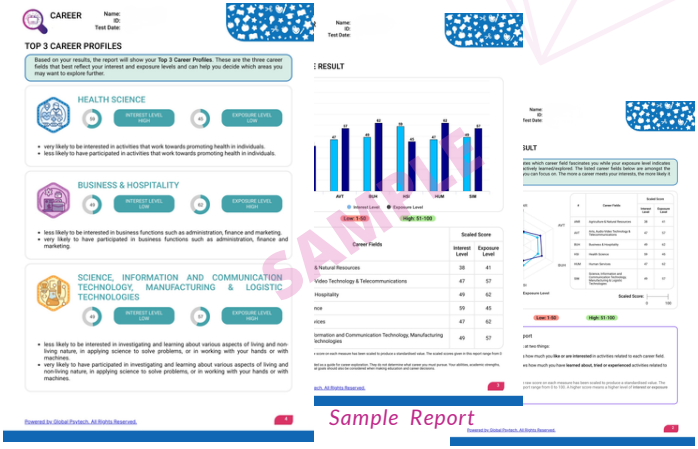
Kompas 10-12 helps students identify the types of activities and areas they enjoy, giving them an early understanding of their interests and preferences.

Career Field Exploration

Students are introduced to different career fields, helping them connect their interests with a wider range of learning and future career possibilities.

Easy-to-Understand Reporting

Results are presented in a simple and student-friendly format, making it easier for students, parents, and schools to understand and discuss the student's interests.



Sample Report

The report provides a personalised overview of the student's interests, highlighting areas they enjoy and career fields they may wish to explore further. It supports early self-discovery and encourages students to learn more about future education and career possibilities.

FEATURES

Scientific, Valid & Reliable

Kompas 10-12 is a comprehensive solution backed by extensive research in psychometrics and behavioural science. It meets internationally-accepted assessment standards and was designed in accordance with recognised principles of good practice in psychometric testing.

Analytic & Reporting

Kompas 10-12 provides individual reports and dashboard-based access to assessment results, enabling schools and authorised users to review students' interest profiles and support early career guidance and educational exploration.

BENEFITS

To Students

- Discover interests and preferences from an early age.
- Explore different career fields in an age-appropriate way.
- Build greater self-awareness and curiosity about future possibilities.

To Schools

- Support early career awareness and exploration.
- Provide insights to support student guidance and development.
- Better understand students' areas of interest.

To the Education System

- Encourage early career awareness and educational exploration.
- Support more informed student development and guidance.
- Provide insights into students' interests to support future education planning.
