STUDENT LEARNING INSIGHTS

INTRODUCTION

Student Learning Insights (SLI) helps adolescents and young adults to cultivate critical skills for success at school and after graduation. These skills include creativity, innovation, courage, problem-solving, and social networking.

SLI automatically generates detailed reports with personalised advice on how students can utilise and improve their skills for academic success, talent development, and career readiness.

In order to prepare students for their future endeavours, SLI assesses six major constructs that include some of the most important skills in the world of the ongoing Fourth Industrial Revolution.

FEATURES

Scientific, Valid & Reliable

SLI is a comprehensive solution based on extensive research in psychometrics and behavioural science. Using cutting-edge digital assessment technologies, it assesses all the most important attributes for predicting adolescents' success at school, at work, and in the community.

SLI Analytical Insights

After less than 15-minute assessment, SLI provides automated reports that users can begin acting on immediately. Results are presented in an easily understood format, with readable explanations of their significance.

Network Monitoring Features

SLI offers multiple dashboards accessible over the Internet for easy monitoring of progress, anytime and anywhere. The dashboards allow users to view results and can be customised for institutions with specific needs.

Language

SLI is available in Bahasa Malaysia and English.

Age Group

SLI is recommended for individuals aged 13 and above.
